

# Tickets Going Fast for HBA Night at Flour Field

Bring the family and join us Thursday night, July 22 at Flour Field at the West End for a night of food, fun, excitement and professional baseball as your Home Builders Association has planned a family night with the Greenville Drive.

The night will begin with a picnic on the concourse including hamburgers, hot dogs, barbeque, baked beans, cole slaw, chips, soda and water. A special \$1.00 beer price will be available on the Upper Deck. The Greenville Drive Mascot, Reedy Rip-It will make an appearance at our picnic for an autograph session and group photo with our HBA kids.

The picnic begins at 6:00 p.m. with a 7:00 p.m. first pitch between the Greenville Drive (Boston Red Sox) and the Hagerstown Suns (Washington Nationals). Bring the family and enjoy a relaxing evening at the ballpark.

## Low Impact Development Breakfast Series: "Using Rain as a Resource" Cullen Pitts, speaker

**Date:** August 28, 2008

**Time:** 7:45 a.m. - 9:00 a.m.

**Cost:** Free, but reservations are requested

**Location:** Innovate Building,

148 River Street, Greenville, SC 29609

**Information:** RSVP to Lisa Hallo, [lhhallo@upstateforever.org](mailto:lhhallo@upstateforever.org), 864-250-0500 x33

Rainfall truly is a natural resource. Harvesting rainfall not only reduces runoff from development sites, but also provides developers and owners an opportunity to make use of this natural resource by capturing it for later non-potable uses such as irrigation. Rain harvesting also reduces the need for public potable water supply and thus reduces costs. Cullen Pitts, AIA will discuss the rain harvesting system at QS/1 Data Systems in Spartanburg, SC. The presentation will include details on the basic design of the system, why cisterns were used at the facility, benefits and challenges experienced so far, maintenance

needed thus far, and costs incurred. Mr. Pitts's discussion will be complemented by a local landscape architect who will discuss the use of native plants and how using native plants can reduce the need for permanent irrigation, another method of saving precious water resources.

Cullen Pitts, AIA works with McMillan Smith & Partners Architects based in Greenville, SC. Cullen will be joined at his presentation by a local landscape architect.

Coffee and breakfast will be provided free of charge.

## Addison's Oliver Completes Designation courses

**ADDISON  
HOMES, LLC**

Allan Oliver of Addison Homes, LLC has completed four of the eight courses required to earn a certified Residential Construction

Superintendent designation from the National Association of Home Builders (NAHB). Oliver completed the courses during the recent Southern Building Show & Conference in Atlanta.

A Clemson University graduate in Construction Science and Management, Oliver was named Project Manager for Addison Homes in 2007. He previously served on the Skanska USA Commercial team that built the High Museum of Art in Atlanta.

The Residential Construction Superintendent designation series is geared toward promising field superintendents and includes eight courses that cover subjects identified by NAHB members as critical to a field supervisory job including: General Project Management; Planning and Scheduling; Budget Management and Cost Control; Customer Service & Homeowner Relations; Safety and Security; Codes and Quality Control; Hiring, Training and Supervision; and Office and Subcontractor Relations.
