Citizens Planning Academy

Directions: Oftentimes, elected officials are persuaded by local data that tells a story about a community's strengths or weaknesses. In small groups brainstorm possible measurable indicators for each factor and methods of data collection. Use the example below as a reference.

Citizens Planning Academy: Sustainability Index with Possible Indicators and Methods for Data Collection		
Factor	Possible Indicator	Possible Method of Data Collection
Tree canopy (example)	*Average number of trees per block*	*Count the number of trees on 20 blocks in your neighborhood and calculate the average*
